ABOUT ME

As an experienced Requirement Engineer and Project Manager, I specialize in translating business needs into clear, actionable requirements. With a strong background in **Requirement Elicitation**, **Project Management**, and **ERP Management**, I effectively guide teams and stakeholders to successful project outcomes. My technical expertise spans **Front-End App Development** and **Web Development**, where I craft intuitive and responsive solutions. As a **Product Owner**, I ensure product goals align with business objectives, while my proficiency in **Documentation** and **Figma (UI/UX Design)** enables me to create detailed project documentation and engaging user experiences.

WORK EXPERIENCE

Software developer

Safe Solution Consultants [19/04/2024 – Current]

City: Peshawar | **Country:** Pakistan | **Website:** <https://www.safesolutionsconsultants.com/> | **Name of unit or department:** IT Department

- Gathered and documented business requirements through **Requirement Elicitation** sessions with stakeholders.
- Managed multiple projects from initiation to closure, ensuring timely delivery and alignment with business objectives.
- Oversaw the implementation and management of **ERP systems**, optimizing workflows for various departments.
- Designed and developed responsive user interfaces for **web and mobile applications** using **React Native** and **React JS**, focusing on user experience and functionality.
- Developed a **client portal** to streamline communication and project tracking, enhancing the user experience for clients.
- Worked as a **Product Owner**, defining product goals, roadmaps, and managing the development cycle to meet client expectations.
- Contributed to an **ongoing precision health project** using **React JS**, focusing on delivering innovative healthcare solutions.
- Created comprehensive **Documentation** for system workflows, features, and user guides to ensure clarity and consistency.
- Utilized **Figma** to design intuitive UI/UX prototypes, ensuring seamless user interaction and design consistency across platforms.

Web Developer (React js)

Hybrid MediaWorks [08/06/2023 – 15/04/2024]

City: Islamabad | **Country:** Pakistan | **Website:** <https://hybridmediaworks.com/> | **Name of unit or department:** Software Development - **Business or sector:** Information and communication

- Worked as a **React JS Front-End Developer**, building dynamic, responsive web applications using **React JS**, **Tailwind CSS**, and **Material UI (MUI)**.
- Developed **responsive designs** to ensure seamless user experiences across desktop, tablet, and mobile devices.
- Integrated modern UI frameworks like **Tailwind** and **MUI** to create visually appealing, scalable, and reusable components.

- Collaborated closely with back-end developers and designers to implement pixel-perfect designs and optimize application performance.
- Focused on delivering **user-friendly interfaces** with smooth navigation and intuitive interaction patterns, enhancing overall usability and accessibility.

Front End Developer (Intern)

Bircube [10/03/2022 – 04/06/2023]

City: Mardan | Country: Pakistan

- Completed an internship at **Bircube**, where I gained hands-on experience in **software development** and **front-end techniques**.
- Learned and applied **front-end technologies** such as **HTML**, **CSS**, **JavaScript**, and **React JS** to build responsive web applications.
- Worked on improving **UI/UX design** practices, focusing on creating clean, user-friendly interfaces.
- Collaborated with senior developers to understand **software development best practices** and enhance my problem-solving skills.
- Enhanced my knowledge of **version control**, **agile methodologies**, and effective teamwork in a professional software development environment.
